471 473 475 477

PRACTICE HINT

9. BREATH CONTROL - Notice that in "No 4.2 - WARM-UP 2", there are no breath marks. As a development exercise, try and extend your breath control by playing as much as you can without taking an extra breath.

10. WARM-UP - Previously, we talked about the importance of a warm-up. Now that we have learnt more, we should plan our warm-up some more. Let's say that in our last session or lesson or rehearsal, we got to half way through this stage. Therefore we should start our next session by playing "WARM-UP 2". After this go back through the previous pages and play some of your favourite tunes and work your way back to this page. Now move into the next new tune.

11. COOL-DOWN - As you get to the end of your session, bring it to a close by going back and playing a couple of easier tunes and play them softly. To end your session, play your favourite tune.

No 4.3 - WATERMELON CUSTARD

478 479 481

Wa - ter - mel - on Cus - tard, Chop it up and mix it in.

No 4.5 - RUN AROUND OUR BACK YARD.

494 495 497

Run a - round our back yard, Play there all day long.

498 499 501

Where's the cric - ket ball now, Lost a - gain I vow.

NEW SIGN - FERMATA or PAUSE

Play the note for the length of time the conductor indicates or as desired by a solo player.

The Fermata is used to pause, slow or hold the flow of the music by allowing us to make a note longer than normal. The sign is placed over the note whose length is to be changed. Note that if we take the first sentence above at "face value", we could use the fermata to make a note shorter.

No 4.6 - CHANGING LENGTH

502 503 505 507

No 4.7 - HERE COMES FRED.

508 509 511

Here comes Fred a gain. What's that in his hand.

512 513 515

A cup of tea I see, He could - n't shift that wall a - gain

KODALY (pronounced Ko-die)

An Hungarian Musician, Zoltan Kodaly invented a system of using vocal sounds to indicate note values and their sound length. The advantage is that once you have learnt the Kodaly method, as soon as the sound is made, you know for how long the note sounds. Also all the sounds start with the letter "T" which is very usefull for wind players who have to tongue the note being played. (There are some exceptions to the "T" rule which we will learn as we need them, e.g. the Semi-breve below.)

When a rest is required, change the first letter of the sound to a "z". Therefore "Ta" which means crotchet, changes to "za" for a crotchet rest.

Use these sounds -

 or  = Crotchet = Ta,  = Rest = Za

 or  = Minim = Two  = Rest = Zwo

 = Semi-Breeve = Four  = Rest = Zour

Clap and sing, following rhythm in Kodaly. A rule to remember is that rests are silent, therefore rests are only mouthed (no noise) and the hands are open when clapping (palms move away from each other.)

No.4.8 - CLAPPING AND COUNTING IN KODALY

Note: Stems up or down does not change the meaning of the note but you can see in the example below that is easier to read when we stick to the rules.

Of course, this does not apply to instruments whose stems are always the same direction.

516 517 , 519

520 521 523

524 525 527

NB: The last note does not start with "T" - this is one of the exceptions.

DUET and DIVSI

So far we have only played one note or line at a time. If we want to play two things at a time, we need two people or two sections. This is called a duet - meaning that two things are happening at the one time played either by two players or two sections.

We can show this on music by using two staves or writing two notes at a time on the one staff. Writing two notes at a time on the one staff has the addition name of "Divsi" which means to divide the notes amongst the players.

Percussionists - Yes, we have already been doing this and more. We will need parts A and B but only with mallets

NB: Piano students, you have already been doing duets with your right hand as part A and your Left hand as part B.
However from now on, your right and left hands i.e. Parts A and B, will not play the same music.

No 4.9 - HOT CROSS BUNS - Duet: To parts, A and B

TONIC-SOL-FA HAND SIGNS

Sol-far signs, are signs made by different hand positions to indicate the notes of a song. By using these signs, we don't have to know the name of a song or, the notes being used.

Firstly, we will call your concert Bb (the note learnt in Stage One), "Do".

This is indicated by the strong fist which acts as a strong base upon which to build the other signs.

When ever this sign is shown, it means to sing or play, concert Bb. Some will play Bb but others might have to sing or play , C or G. F and Eb Brass and Eb Clarinets, remember that your note will sound different.

The next sign is "Re"

which means to sing or play Concert C (the Stage two note).

Next is "Me"

sing or play concert D (the Stage Three note)

Now add low "Ti"

Sing or play concert A (our new Stage Four note)

No 4.12 - DUET TIME - While one or more players play this tune,
do the correct sol-far signs at the same time.

560 561 563

FOLLOWING THE CONDUCTOR

You may have gotten some idea now, on how to follow the conductor. What the conductor is doing, is showing exactly where each beat (count) begins.

At this level of playing, the most important beat is the 1st beat of a bar. All of your music so far, starts on beat one and, we must all start the beat together. To start the music, the conductor will raise the baton to show that it is time to breathe before playing the first note on beat one. Different conductors will do this in different ways. The conductor will lift the baton and then bring it down again at the same speed as the music is to be played.

Now imagine that there is a horizontal line just above the conductor's stand. When the baton hits that imaginary line, is when all instruments make their sound. Imagine that you can hear the baton hitting that line, like a drumstick hitting a drum. Your instrument's sound is that at that exact same time.

Beats 2, 3, and 4 will be played exactly at the same time as the baton hits that line again but, for beat four, imagine that there is now a vertical line.

The diagrams show an arrowhead hitting the lines, when the arrowhead hits and bounces off the line, your instrument should sound at the exact point.

NOTE: These diagrams are as seen from the player's position.

The point at which the baton hits is called the "Ictus". Different conductors will have slightly different ways of connecting the Ictus to the next one so always watch for the Ictus. Watch for other hand signals such as "stop", "play stronger" and, "play gentler".

No 4.16 - CONCERT TIME DUET 1, (MEDLEY 3)

Duet Time, Lindy Loo, Do Re Me, Round our Back Yard

601 , 603 , 605

SOL-FA ACTIVITY

One student standing in front of the Band/Group, makes-up a sequence of Sol-Fa signs and displays those signs to the group one at a time. The Group then plays the notes corresponding to the sign displayed and, for the length of time displayed.

The student may use a known tune to select the sequence of signs but also, should be encouraged to compose a new sequence.

No 4.17 - CONCERT TIME DUET 2, (MEDLEY 4)

Watermelon Custard, On the Beach, Here Comes Fred Again, Let's All Hit the Floor

NB: The part A and B titles are now only shown on the first stave.

BODY PERCUSSION

Another form of music and percussion, is to use your body as a percussion instrument. When you clap your hands, you are performing body percussion. When you stamped your feet in the previous duet or solo, you were using body percussion, So, when you clap, slap, stamp etc., different parts of your body, you are using multi body percussion.

On music, we can use different signs and different stave positions to represent different body percussion notes.

No 4.21 below shows the three body percussion notes we will use first.
